

I understand the stations like K-LOVE could possibly be taken off the air and replaced with LPFM stations. Please consider keeping K-LOVE on the air as is. It is the only radio station we listen to, as well as many other residents of our community. We are able to not only be encouraged by the content, but we can also let the station stay on whenever children are around. Most other options could not say the same. In our network of friends, this is the only station we listen to...it would create a huge void if it were not available. We are able to find out about local happenings, world events of interest to us, and items of interest. I don't believe that would happen with a program that isn't like K-LOVE. Please do not take away this source of programming. Thanks for listening.
